

News Release

Provant Chief Information Officer Tom Basiliere to Speak on Mitigating Data Breach Risks

EAST GREENWICH, R.I., October 23, 2017 -- As part of a [webinar](#) series sponsored by Compass IT Compliance, Tom Basiliere, CIO for Provant and its parent company Hooper Holmes (OTCQX:HPHW), is presenting a session on information security and mitigating breach risks on October 25, 2017. Provant is a national health and wellness leader that works with organizations across all industries to improve employee well-being.

In his presentation, Basiliere will discuss traditional mitigation practices, layers of vulnerability, data architecture, the new risk landscape, and enhancing mitigation techniques.

With his deep experience in information technology (IT) and protection of wide-ranging, confidential data, Basiliere fully understands the need to integrate security into the strategic development process. As Chief Information Officer for Provant and Hooper Holmes, Basiliere has built an IT team that includes experienced senior-level data security professionals. The team conducts security architecture assessments as part of the software development cycle, effectively building safeguards into the systems from the outset.

If your organization is considering a corporate well-being program that involves confidential personal information, contact Provant at Connect@ProvantHealth.com for more information on how to engage employees and secure their data.
